Subject: Invitation to Register with the Energy Practitioners Directory

Dear Energy Practitioner,

As St. Kitts and Nevis remains on its transformational trajectory toward sustainable energy development and innovative uptake, the Energy Unit has been fully engaged in supporting this transformation and engaging with a strong, interdependent community of energy professionals. In this regard, we invite you to register your skills and expertise in the “**St. Kitts and Nevis Energy Practitioners Directory**”.

This directory is meant to be a sourcebook that will facilitate finding and verifying, and then contacting their respective counterparts involved, in whatever way, within the energy sector in the Federation. Be it recruitment, consultation, or collaboration, this directory will prove to be an important tool for further projects and initiatives regarding energy.

Why Register?

Increased Visibility: Your expertise and skills will be made available to a wide range of stakeholders and potential collaborators. This leaves the possibility open for consultation on projects, contracts, or partnerships with your qualifications.

Professional Validation: Another critical function that the directory will serve is that of a reference tool for credentials verification and assurance of the highest standards for energy sector professionals.

How to Register: Please follow this link (<https://tinyurl.com/2s3cvfxu>) to access and complete the form, or for further assistance please do get in touch with us using the contact information below. Submissions should be received by no later than, as we hope to go live with the directory on.

Your involvement will go a long way in establishing a sound and healthy network that will form part of the new developing energy frontier of St. Kitts and Nevis. Together, we can accelerate the transition toward a future that is sustainable, resilient, and energy efficient.
